

We are proud business owners and supporters of the motion picture industry in Washington State.

The impact of motion picture production on an economy is undeniable. From paying cast and crew to buying meals, from renting locations and hotel rooms to purchasing materials to build a film set, a production spends money with a diverse group of businesses, such as our own. Since launching the program in 2007, the Motion Picture Competitiveness Program has brought \$96.3m in direct spend in our statewide economy and created over 14,000 jobs for Washington workers.

We are local businesses that pay business and occupation tax as well as create jobs for full-time, year-round employees. We support the film industry and the production incentive program because it creates jobs and keeps businesses like ours going. It builds a robust and stable economy, and that is crucial and indispensable to Washington State.

Please support the legislation to increase the fund for the Motion Picture Competitiveness Program
